Research Interests

Large Language Models, Vision-Language Models, Large Vision Models, Computer Vision, Natural Language Processing, Medical Imaging Analysis, Generative Adversarial Networks, Machine Learning and its applications.

Education

B. Sc. in Computer Science and Engineering *July 2019 – December 2023*
Ahsanullah University of Science and Technology *Dhaka, Bangladesh*
Undergraduate Thesis Title: *Generative Adversarial Networks for Crop Disease: A Case Study with Potato Disease Classification and Instance Segmentation*
Supervisor: *Dr. Mohammad Shafiul Alam, Professor, Department of CSE, AUST*
CGPA: *3.302*

Research Experience

Research Assistant *June 2024 – Present*
Supervisor: *Dr. Laith H. Baniata, Research Professor, Gachon University, South Korea*

- Carried out research on **"SentimentFormer: A Transformer-Based Multi-Modal Fusion Framework for Enhanced Sentiment Analysis of Memes in the Under-Resourced Bangla Language"**. This work was supported by the Basic Science Research Program of the National Research Foundation of Korea (NRF), funded by the Ministry of Science and ICT under the grant NRF-2022R1A2C1005316.
- Conducted research on **"Investigating the Predominance of Large Language Models in Low-Resource Bangla Language Over Transformer Models for Hate Speech Detection: A Comparative Analysis"**. This work was supported by the Basic Science Research Program through the National Research Foundation of Korea (NRF), funded by the Ministry of Science and ICT under Grant NRF-2022R1A2C1005316.
- Currently working on the research titled **"Dissecting the Reasoning Capabilities of Vision-Language Models in Medical Visual Question Answering: An Zero-shot Chain-of-Thought Approach"**.

Work Experience

Dexian (Bangladesh) Limited. *May 2024 – Present*
Application Developer (AI/ML) *Dhaka, Bangladesh*

- **Project 1: RFPMatcher**
  - Developed a RAG solution to extract key information from Request for Proposal (RFP) documents
  - Built a system using in-context learning to generate a Past Experience Matcher score for evaluating new RFPs against previous responses
  - Compared bids from previous Requests for Responses using Chain-of-Thought Prompting to systematically predict potential win or loss outcomes for new proposals
  - Generated Tables of Contents based on new Request for Proposal documents to assist in writing proposals for new bids
  - **Technologies Used:** Python, LlamaIndex, Azure OpenAI, AlloyDB, CouchDB, React JS, FastAPI
- **Project 2: Org Info**
  - Implemented a VLM-based agent for extracting hierarchical information from organizational organograms
  - Created a relational database to store organizational hierarchy data
  - Converted natural language queries into SQL using Self-Consistency Prompting and executed them to retrieve relevant data from the database
  - Developed an OrgChart framework to intuitively display hierarchical information based on user-selected organization name and department
  - Built an chat interface enabling users to interact with specific organizational hierarchical information
  - Set up scheduled jobs to fetch organizational data from Bullhorn every 30 days and visualized organizational information in OrgChart
  - **Technologies Used:** Python, LangChain, LangGraph, Azure OpenAI, OpenCV, Azure SQL, React JS, FastAPI

- **Project 3: CaseAligner**
  - Built an LLM-powered application that generates PowerPoint presentations for case studies based on selected practice areas and industries
  - Implemented an interactive chat interface allowing users to query specific slide content and receive instant contextual responses
  - Developed comprehensive search functionality to locate information across all generated case studies
  - Created export capabilities for downloading slides in company's official template
  - Designed an admin panel for authorized users to download and edit the knowledge base of case studies
  - **Technologies Used:** Python, LlamaIndex, Azure OpenAI, React JS, FastAPI
- **Project 4: AgentDexi**
  - Designed an LLM-based multi-agent system to generate customer intelligence by analyzing job demand
  - Developed an RAG solution to identify technological trends in job descriptions across external companies
  - Created interactive graphical charts to help technical recruiters view insights and optimize hiring strategies
  - **Technologies Used:** Python, LangChain, CrewAI, Azure OpenAI, React JS, FastAPI
- **Project 5: KnowledgeEngine**
  - Developed an LLM-based, multi-document RAG Q&A system for internal document information retrieval
  - Implemented a chat conversation interface with document page references for information sources
  - Ensured data security with dedicated knowledge bases for each user session
  - Created an admin panel with document upload functionality and comprehensive document management capabilities
  - **Technologies Used:** Python, LlamaIndex, Azure OpenAI, AlloyDB, React JS, FastAPI

Ongoing Research Projects

- MindSpeak-Bangla: A Domain-Specific Dataset for Automatic Chain-of-Thought Adaptation in Mental Health Support for Low-Resource Bengali Language Settings
- BanglaMedQA: A Comprehensive Dataset for Adapting Zero-Shot Chain-of-Thought Reasoning in Bengali Medical Question Answering
- BanglaDialect-Synth: An Approach for Synthetic Corpus Expansion of Bangla Regional Dialects Through Few-Shot Learning with Large Language Models

Technical skills

Programming Languages	Python (NumPy, SciPy, Matplotlib, Pandas, Seaborn), Java, C++
Web Development	HTML5, CSS3, JavaScript, FastAPI, Flask, React, Streamlit
Database	MySQL, MongoDB
Deep Learning Frameworks	TensorFlow, Keras, PyTorch
LLM Application Frameworks	LangChain, LangGraph, LlamaIndex
LLM Evaluation Frameworks	LangSmith, DeepEval
Vector Database:	ChromaDB, FAISS
Cloud Services	Azure OpenAI, Azure SQL Database, Azure App Service
Others	Apache Airflow, Docker, CrewAI, Prompt Engineering, OpenCV

Awards & Achievements

Poster Presentation *5th August 2023*
RESEARCH SYMPOSIUM 2023: AN INTRA-AUST RESEARCH EXHIBITION *Dhaka, Bangladesh*

Classification of Potato Disease with Digital Image Processing Technique: A Hybrid Deep Learning Framework, secured 1st position in **"RESEARCH SYMPOSIUM 2023"** organized by AUST Research and Publication Club. **[Poster Link]**
